Refleves O'Brine at 11 A. M.

At eleven o'clock a. m. Red relieved me and took the control. I had found that the ship was easy on the controls and almost no care at all to fly. We were started with everything in our favor and it was only a question in our minds how long the old motor would run. We were out to break the record for endurance flying and everything seemed O. K.—Ohie.

Here we were for better or worse in our little Curtiss Challenger Robin. It first light ship ever to attempt an endurance flight.

Previously all such endurance tests had been made in larger ships, with plenty of room and plenty of power. Ours was a small ship and one of the questions at stake was whether two men could do their work and exist in good health within such cramped quarters long enough to better the old gaster of approximately 247 hours.

Two Feet of Leg Room.

The Curtiss Robin is built to hold a gliet and two passengers seats were taken out of the St. Louis Robin to make way for the oblong 125 gallon tank. Between the top of this tank.

As one or the other of us took the controls we had before us the instrument board, which required constant watching to check the progress of our flight. The instruments on this board, arranged very like the dashboard of an automobile, are the tachometer, which gives the revolutions per minute of the motor; the oil pressure gauge, which would be the first place for us to note trouble with the emgine:

The complete story of our flight is expected to take from §0 to \$5 hours, which would land the big ship in the United States some time Sunday.

The ship was taken out of the hangar at 3:11 a. m. and was taking the air at 3:15, when the guards signalled they had seen a shadow jump on top of the Zeppelin from the hangar. The ship was held up while searchlights combed its flanks and all eyes peered for trace of a stowaway, but no one could be found. Dr. Hugo Eckener, commanden of the dirigible

The leading beauty experts of the Rhine country

A treatment endorsed by 16,512 professional beauty experts in America alone. Neverin all history-such tremendous endorsement of any single product as this world-wide recommendation of Palmolive Soap!

EVEN before you leave the train or the Rhine steamer, you hear of the marvels accomplished at the Beauty Salon of Sterck-Schinzel in Cologne. Situated on the "high street," near the Köln Cathedral, it has been the most renowned beauty establishment in the entire Rhine district ever since its opening in 1899.

Schinzel, who superintends all salon treatments, ex-plains why he features Palmolive Soap in his shop—why he always advises its use for the care of the skin.

"A skin which is properly cleaned every day with soap and water will respond the more readily to treatment and improve remarkably in quite a short time.

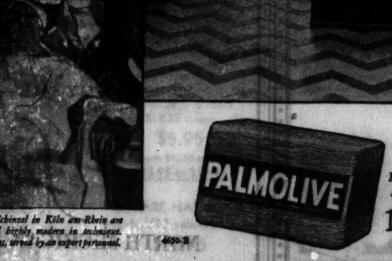

"Not that I recommend all soaps indiscriminately.

Many soaps contain harsh ingredients that are definitely

ful to the skin. I always advise my clients to use Palmolive because it is a pure blend of olive and palm oils, both of which have been recognized for thousands of years as wonderful cleansing agents and emollients."

In recommending Palmolive, Sterck and Schinzel join an international gallery of beauty specialists who advise this twice-a-day treatment: massage a creamy lather of Palmolive Soap and warm water, then with cold, "Use this as a basic treatment before applying any cosmetics, if you'd retain a smooth, lovely skin," auorities tell you-in 280 American cities and in all the

BY OSCAR HEWITT.
It appears improbable now that the proposed new transit company ordinance-franchise will be drafted by aug. 7, as desired by the council local transportation committee. According to efficial announcements the work of writing has not started.

The transit companies' lawyers met yesterday morning with the representatives of the city and citizens' committee and asked for more time. The city and its experts completed consideration of the Kelker ordinance last Priday afternoon, and the noncontroversial sections of this ordinance were indered to the companies as the city's proposal of an ordinance. The companies' lawyers claimed that they fld not get the amended Kelker ordinance, as proposed by the city, until last Tuesday afternoon.

Given Until Temerrow.
So the companies' lawyers yesteray morning pleaded for more time in which to read and study the amended Kelker draft. They were given until tomorrow morning and the deadine set by the city for the first draft to part Wednesday.

There was no indication yesterday that any progress has been made toward an agreement on the controversal sections of the franchise. These include rates of fare, compensation to the city, public benefits to be paid, the rate of amortization, the financial provision for subways, the form of consolidation of the companies and their financial setup.

Consolidation Is Discussed.

In the two hour session yesterday, some time was devoted to consolidation and the representatives of the companies were unable to give the information which Attorney Walter L. Pisher and Ald. E. I. Frankhauser [49th] have requested.

A meeting of the subway committee is scheduled for this afternoon.
William J. Newman and his backers have promised to present some suggestions which they think will interest the aldermen. None of the important features of a subway, such as location, size, number of tracks, method of financing and cost, has been decided by the city.

Astounding figures of population growth . . . . constantly increasing commercial, industrial, and financial importance . . . municipal, state and na-tional improvements of vast extent . . . a coming Century of Progress Fair that should awaken the world . . . a record of suburban growth and progress unequalled in the history of any city—are but a few of the many factors to show thinking people the advisibility of securing real estate in Metropolitan Chicago NOW.

Well-located property in Metropolitan Chicago is, today, a "good buy" at almost any price. When you realize that — not so many years ago — people laughed at "fools" who paid a few hundred dollars for Chicago lots now worth thousands, you know that the only basis for

judgment of realty values is the probabilities and possibilities of its valueenhancement. Today these factors are far greater ... surer . . . closer . . . than they were a few years ago when the foundations for some of Chicago's great fortunes were being laid on investments in Chicago

Modern financing makes real estate purchase convenient . . . anyone can

share in its benefits. It is no longer necessary to invest a large cash sum to start on the real estate road to fortune. The partial payment plan of buying real estate works just as well—and probably brings more advantageous results—than the same means of buying most any other commodity.

Certainly Metropolitan Chicago real estate at this particular time deserves investigation by everyone interested in their future welfare. Search carefully . . . consult experienced investors . . . follow the same safety signals you would in making any investment . . . and you will discover outstanding bargains NOW that will never be found again.

Include the offering of this firm in your investi-gation. You will find that it combines value with low price in remarkable manner. The McIntosh organization long ago secured and started development on a choice property at the edge of a most desirable suburban community, and now offers it on the basis

of its old purchase price-with all the value left inf Your best guide to the de-pendability of this firm is its record of more than twenty successful years ... and the fact that more than 30,000 people now live on properties developed by us.

Mail the coupon below for interesting FREE data on Metropolitan Chicago and full particulars about our present offerings.

Look at these examples of great values that prove the wisdom of present purchase—these are typical of McIntosh offerings.....

# Moving Food by Rail

The railroads of the United States annually transport one carload of perishable the country, on the average, and the movement is growing every year.

The benefits of this service are farreaching. For one thing, it greatly increases our food resources. Many foodstuffs that can be successfully produced only in certain localities are transported great distances to places where otherwise they could rarely or never be had. Other foodstuffs, such as fresh vegetables, which are in season locally for but a short period of the year, are brought to our tables from distant regions at other times, thus making them virtually year-round articles of diet. This broadening of the nation's food supply has been instrumental in raising our standards of living and making for better health.

practical kind. It increases the farmer's sources of income by enabling him to go in for crops that otherwise could not be marketed. It also enables him to get better prices for such crops, since they can be shipped to the most favorable markets, regardless of distance. The fact is that for real aid to the farmer the transportation provided by the railroads for both perishable and non-perishable farm products can scarcely be outclassed. work now abassoult a

These benefits are typical of the outstanding value of railway service as a national asset. The protection of this asset is one reason for patronage of the railroads and for helpful public policies in matters of their welfare.

RIGIDAIRE has always been powrered and designed to freeze ice cubes quickly. And now you can freeze them even more quickly. In fact you can now regulate at will the time it takes to freeze them.

Each Frigidaire household model is now equipped with the new Cold Control... a simple patented device with six different freezing speeds. If a large party or excessively hot weather creates an unusual demand for ice cubes, simply set the dial at colder and use all the ice cubes you need.

Another important feature of every household Frigidaire is the patented self-sealing ice trays. The tray fronts automatically seal the travs into the intense cold of the freezing unit. They permit you to keep the freezing compartment colder without making the food compartment too cold.

See these features on the beautiful models now in our showrooms. Study the construction of Frigidaire point by point. ### RACKETS IN THE DOG DAYS.

The Employers' association observes that the rackets in Chicago are in the dog days. Among the rackets which are reported suffering are the leaners and dyers, laundry, fish dealers, garage, and funeral. The change, however, does not represent a triumph of good over evil, but is merely the inevitable consequence of systematized extor-tion. So long as business could sustain the rackets the extortionists prospered, but the rackets seem now to have so plundered legitimate enterprise that the carcass is spare and the vulture

An analysis of the racketeering system shows convincingly at it could not indefinitely survive. The racketeer offers no service to his victim. By intimidation and coercion the proprietor usiness may compensate for the price of security by the charges to his customers. But public the name of law. do, to the undoing of business and racket alike. For instance, the public has outwitted the cleaners and dyers racket by sending their clothes to cleaners outside of Chicago. Consequently, with the Chicago cleaners in the doldrums, there was little for the racketeers to feed upon.

In this apparent collapse of the racket and racketeered business the delinquency of the authorities is emphasized. The authorities have contributed nothing to the downfall of the racketeers. By the tolerance of rackets by prosecutors legitimate business has come to a condition of starvation, a condition which could have been avoided had the authorities conducted an aggressive campaign to eliminate the rackets. The acketeering system originated under the superrision and promotion of corrupt authorities; t has thrived under the tolerance of incompetent authorities; if it expires, its death will be caused by its own vicious economic falsity,

The measure of economy in defense expenditure which the President wil have the greatest difficulty in accomplishing is one which has the least excuse for existence. And it will not be the army and navy men who will resist it, but congress. We refer, of course, to the abolition of obsolete posts and navy yards. They are congressional relon the best type of boat. (Being the last chapter of "All Quiet on the Western Front," if the hero had been James C. It will try simply created danger. Theoretically, not calculating to tell of men who, even though they escaped un who stand face to face with it. It will try simply public resentment and ingenuity, the owner of a hurt fighting for their country on foreign fields, returned to their own homes to be destroyed in

> The war is over. The armistice is signed. Now we're through with trying to kill or escape being killed. We're going home. We're going back to the good old United States.

What heroes they made out of us when we went away! I hope they'll cheer for us when we come back. Well, I guess they will. We've done a good job over here. Anyhow, that's what the French and the British and the Canadians tell us, and they ought to know.

And now we're going home. No more war. Just peace and happiness. No more mud and trenches and barrages and shock troops coming over with sharp bayonets to pitchfork us out of our trenches. No more standing in the foggy gray dawn waiting

We're going home. It'll be great to see the little old farm down in Oklahoma. I used to hate plowing and hoeing and milking the cows, but it'll be good after this. Think of starting out peacefully in the cool mornings after one of good breakfasts and coming home at night to sit under the big stars through long, quiet evenings. Peace and home! I'm lucky, I came through alive, with no gas in my lungs and no arms nor legs missing. Before me is a long peaceful life. I'm glad I came. We've made the world "safe for democracy." We've fought for the old Stars and Stripes. And I'm safe and well and going home. I feel like singing-

My country, 'tis of thee, Sweet land of liberty, Of thee I sing. We're going home, we're going home!

The months pass by. The summer of 1929 is the most bloody and the most terrible.

While we were fighting in France there was a well marked front; we could always know from which direction danger threatened. The Germans were uniformed and we could know our enemy. Then, too, in France we could dig fox holes and the wife of the President was not present and as trenches to shelter ourselves from the foe. And there, too, we were not fighting with our wives and children right behind us in our homes and did not have always the haunting, terrible fear that bullets intended for us would strike down our loved ones. dren deliberately break. There are our wives and children. We didn't have them when we were in France. We might have died then and not left wives and orphans penniless. We have our little farms and we feel that we should be left alone to work for our families, to enjoy "life, liberty, and the pursuit of happiness," promised in the Declaration of Independence and guaranteed by the constitution of our country. We fought for the Stars and Stripes in France and we feel we deserve its protection in our own homes, surrounded by our families.

There they come. Are they farmers like our thieves? Are they federal agents bent on our destruction? We cannot tell. They are armed They do not come to our front doors, so they cannot be friendly neighbors.

If they were German soldiers, we would know at once and open fire on them. But they are not in uniform. There they are at our chicken coops. They must be thieves. They are after our cattle, our chickens, our farm implements.

Now the bullets are flying. They sing fast and furious through the air. They are enemies, but who are they? We cannot tell. Perhaps they are federal dry agents and we should submit quietly.
They will find nothing here. But perhaps they are thieves, bandits. All we know is that we must pro-tect our homes. The bullets come closer. Harris is hit. His face is bleeding.

I can do nothing for him. He is dving. To think of crossing the wide ocean and facing a foreign foe, and then to be shot down here in his own land, under the flag he fought for, his wife and children in his home just behind him. It is impossible. Such a thing cannot be.

Oh. God, the horror of it! Oh. God, the share it! More bullets. One grazes my head. Another one. And more. There is no use dodging. The shots are coming too thick and fast. That one got me! I believe I'm done for! Oh, God, if I c only crawl into my house and see my wife and the

ESSENTIALS OF CHILD'S SHOES.

R. JOHN P. ADAMS lays down the following essentials for children's shoes:

1. Breadth of the toe: The shoe should be sufficiently broad to allow the toes to assume a natural weight bearing position. This require-ment is generally met in the shoes of very young children. It is not usually met in the shoes of older children. It is rarely met in the shoes of children

2. Length: The shoes should be at least one-half inch longer than the weight bearing foot. To determine this requirement a tracing is necessary. The feet of children grow rapidly. Shoes are generally outgrown.

3. Depth and fullness of the tee: The moocasin toe and the turned in toe have corrected the old time abuse in this requirement. Dr. Adams finds children's shoes generally satisfactory on

4. Close fitting heel: The only part of the shoe which should fit snugly is

5. Height of heel: The "paper bag shoe worn by babies should not have a heel. In shoes of children under 31/2 years of age the heel should not thicker than the sole. For children 31/4 to 5 years of age the heel should

6. Depth of the shoe from its top to the sole in the region of the arch: Children's shoes, as a rule, do not arch enough on top. The instep is too low. There is not enough depth from the top of the foot to the sole, in the region back of the toes and ball. One conback of the toes and ball. One con-sequence of this fault is that the foot and leg muscles are not given enough play in running and jumping. Track shoes cannot be faulty in this requirement. When children's shoes are too low in the instep their feet are cramped in play and the sole of the shoe is apt to split in the region of the instep. outside bearing from the tip of the little toe to the width of the heel: The natural weight bearing should fall on the straight outside of the foot with the feet parallel. There should not be a narrowing of the sole at the counter. Dr. Adams is emphatic in his advice that children stand with their heels apart and their feet parallel. He thinks the advice to stand with the "heels to-gether and the toes turned out" was very bad and has done much harm.

REPLY. 1. I know of no government bulletin that indorses permanganate as strongly as you think. The best preventive next to avoiding the cause is to wash the skin with strong soap suds soon after exposure. The best early treatment is the ferric chloride solution. The best late treatment is boric acid dressings.

Potter's discount of the left of the series of the ser ision of the 19th corps. In each galery was placed a charge of six tons of powder. Grant's plan was to ex-plode the mine and attack en masse multaneously. Sheridan was ordered recross the James river with the to recross the James river with the whole cavalry corps and attack from the south and west of Petersburg. The mine was exploded at 4:30 in the morning. The explosion was not as great as expected, but threw up a vast mass of earth and stone, several feet high. Gen. Ledlie's brigade led the attack. Up to the moment of writing the hill had not been carried. A more awful roar of artillery has not been heard since the first battle of Fredericksburg than that made by our 125 guns which opened fire on Petersburg. The spectacle was grand Petersburg. Remove cold cream this way with requirements of the individual purchaser . . . Laquir an ut Kleenex Cleansing Tissues

THOUSANDS of women who use cold cream wonder why they don't get the right results ... why their complexions remain muddy or sallow despite all their efforts. Often it is because they don't know bow to remove cold cream.

You should rub cold cream off, not in. Kleenex Cleansing Tissues show you how to keep the skin radiantly fresh. They are fine, pure-colored tissues made just for the purpose of absorbing cold cream. They lift off grease and imbedded dirt, keep the cream from sinking into the pores.

Compare this method with dangerous "cold cream cloths," that harbor germs. Compare it with towels, whose harsh surface is not made to absorb grease and cream.

The oils in face creams ruin tovels. Frequent laundering is expensive. Kleenex is used once, then discarded. It costs so little that other ways are extravagant in comparison. And you'll discover dozens of time and labor-saving uses for it, just as other women have.

Doctors advise Kleenex instead of handkerchiefs when you have a Buy a box - the New Box in a choice of 3 colors or white - at any

Thin Folks Add 5 to 15 Lbs. Often in Few

Weeks With New IRONIZED YEAST. Results Guaranteed - or Pay Nothing

"I gained 5 lbs. while taking IRONIZED YEAST. That means quite a bit, as my parents are both thin. What I prize most is the difference in the way I feel and the pep I have. Before I took IRONIZED YEAST I had to hire a girl to help me with any hard work. But now I do all my housecleaning alone and help my mother with hers too.

"I went through taking care of two cases of whooping-cough in which I lost one of my little girls. I am sure I would have been down sick in bed if I had not been taking IRONIZED YEAST at that time, as I was caring for the baby I lost almost night and day for 3 weeks. IRONIZED YEAST I am sure helped me to be here to write this now."—Mrs. George Decker, Kingaley, Pa.

Will Understand The Opportunity Presented In The Offer For Sale Of A Tract Of Over 66,000 Acres - More Than 104 Square Miles - Of Woodland, Fertile Farms, Lakes and Beach On The South Carolina Coast in The Heart Of The Rapidly Growing South.

The tract offered for sale lies almost in the center of a curve in the South Carolina coast-between Wilmington and Charleston. It has a twelve mile frontage of broad unsurpassed beach on the ocean. It is midway between New York and Palm Beach.

The chief significance of this location is its magnificent year round climate. It is equable, invigorating all year. Gulf stream breezes from the ocean and Southern temperature maintain a uniform climate.

40,000 of the 66,000 acres have game-deer, coon, o'possum, fox, quail and dove, turkey and duck.

There are nine fresh water, woodland lakes stocked with fish within a thousand feet of the ocean.

On the beach a new million dollar hotel is just being completed. All rooms have baths, both salt and fresh water. It is less than 200 feet from high tide yet is 30 feet above high tide.

Two other hotels are on the property; a two mile boardwalk; an unusually good 18-hole golf course, with grass greens and nine additional holes under construction, and a country club with 40 rooms; tennis courts, bridle paths.

There are two rapidly growing communities, 3 miles apart, of home owners, churches, schools, playgrounds, a nutrition clinic of note, apartment houses, modern stores of all kinds, a telegraph office and post office, miles of paved streets, boulevards and sidewalks. A new high-way is being developed through the property by the County Authorities which will be a link in the main highway from New York to Florida-known as The Kings Highway over which Washington traveled in 1791.

A considerable acreage of rich farmland is under cultivation. Three crops are grown a year—potatoes, corn, hay in rotation. The vegetables have a high iodine content. And the growers enjoy the benefit of an early market feature.

Cattle and hog raising are being carried on with profitable results.

The Atlantic Coast Line Railroad has built a broad guage line to the property. The short unfinished gap in the Inland Waterway from Boston to Florida has been surveyed through it and recommended to Congress. An airport with hangar, of the approved government type,

These are a few of the facts about the property for sale. The foundation is laid for a year-round resort-city, greater than any other on the Atlantic Coast. No other tract of such size with so many advantages of climate, soil and beach can be found on the Eastern seaboard.

With our modern transportation facilities—the air-plane, the motor highway, the express train, the fast steamship service, this property is easily accessible to the centers of population. By train it is a day from Chicago, seventeen hours from New York and New Orleans, thirteen from Washington and fifteen from Palm Beach.

Nothing has been said about the beauty of the property.

Perhaps it is best to simply quote from the letter of one of our foremost architects... "It is a place that no one can see without getting a thrill... a virgin forest over a rolling country coming down to a perfect beach that stretches away as far as the eye can reach in either direction. It seemed impossible that I had left New York at six o'clock on a Friday night, was back at my office at half-past ten Monday morning, and had spent from Saturday noon until late Sunday afternoon in such a place."

To a man of great wealth or a group of such men, the building of this property into the greatest all-year resort-city on the Atlantic Coast is an undertaking that will appeal to both imagination and sound judgment. The possibilities for profit are incalculable.

The complete details of the property are available.

# Harmers again add millions more to buying power of the CENTRAL STATES

T. O. T. Minner of

ORTUNE rides high in the Chicago territory. Nature favors these five states: Illinois, Indiana, Iowa, Michigan and Wisconsin. 1927 gave the farmer a billion-dollar gain in income over 1926. 1928 recorded one of the largest crops in history. Bumper harvests enriched the Chicago territory. This year again farmers here give greater impetus to buying power. Farm prosperity in this region invites special attention from advertisers. Now is the time to take full advantage of local well-being and freespending. Tell your story to this audience through the Tribune. # FARMERS REAP BIG DOLLAR CROP IN MIDDLE WEST

Harvest Prospects Fine as Prices Soar.

BY FRANK RIDGWAY. Midwest farmers are beginning to harvest a bumper crop of dollars because of higher prices of grain and live stock due to crop shortages in other sections. The agricultural buying power of the central states, particularly Illinois, Iowa, and Indiana, shows a much greater improvement than other areas of the United States. Rough estimates indicate that the wheat growers of the central states will get approximately \$25,000,000 more for their crop this year than last, while the northwest growers more for their crop this year than last, while the northwest growers will fall short about \$19,000,000. In the five great states around Chicago—Hinois, Iowa, Indiana, Michigan, and Wisconsin—there will be about \$7,000,000 bushels more wheat than last max. With these states not included the rest of the United States will be 105,000,000 bushels short, according to calculations made by Nat C. Murray, a Chicago crop authority. Camada Faces Huge Shortage.

North American wheat growers are about 336 million bushels short of last year's crop. The bulk of this big shortage is in Canada, where it is estimated that this year's harvest will yield about 270,000,000 bushels, compared with 534,000,000 harvested last year. Canada's shortage is likely to be even greater as a result of unfavor-

be even greater as a result of unfavor-

able weather.
Wheat producers of the middle west are still further favored because the spring wheat crop is expected to drop from the yield of 324,000,000 bushels last year to an estimated yield of only 251,000,000 bushels this year. Kansas, Nebraska, Oklahoma, Texas, and Colo-rado are short more than 55,000,000 when the wheat is harvested in the Dakotas, Minnesota and Montana there is expected to be a shortage of more than 70,000,000 bushels compared with last year.
All Crops Improved.

Besides their advantageous position wheat, farmers of Illinois Iowa, Indiana, Michigan and Wisconsin will make a better showing on practically all of their crops than they did last year. They not only have an abundance of small grain but they have plenty of hay and feed to fatten their

In these five states farmers still have a chance to mature an average corn crop and they have more than which they will be able to market their crops at high prices. The corn crop is yet to be made. July weath-has helped to offset the late start and Mr. Murray believes that favorable weather in August will bring the corn crop up to the average for the corn

Impressive gains in both gross and net income continue to be reported by the Utilities Power & Light System. For the year ended on March 31, 1929, the consolidated net income of the Corporation and its subsidiaries was reported at \$3,827,420, an increase of 14% over that reported for the year ended on December 31, 1928.

We believe that the following factors will be responsible for the sustained prosperity of this system in the futures

(1) Character of the system's business (chiaffy the sale of electricity for light and power).

(2) Excellent possibilities for growth of the territory served which includes the important cities of St. Louis and Indianapolis, thriving residential, and agricultural sections in diverzined areas of the United States, and leading industrial centres of Great Britain, including Birmingham, Smethwick, Dudley, Kidderminister and Banbury, as well as a portion of the City of London.

# **Cuba Cane Sugar Corporation**

A Plan and Agreement of Reorganization dated as of July 25, 1929 have been formulated by the Board of Directors and the undersigned members of the Board have been named to act as a Reorganization Committee thereunder. In view of the present financial situation of the Corporation and the unsatisfactory conditions in the raw sugar industry, the maturity on January 1, 1930 of \$25,000,000 principal amount of the Corporation's Convertible Debenture Bonds makes a prompt reorganization of the Corporation necessary. Failure to approve the Plan will result in costly and protracted receivership proceedings which will be to the disadvantage of all the security holders of the

This Plan calls for the organization of a New Company to acquire the assets of Cuba Cane Sugar Corporation and in order to make the Plan operative it is necessary to obtain as nearly as possible the unanimous consent of the holders of the outstanding securities of the present Company through the deposit of their holdings pursuant to such Plan and Agreement of Reorganization on or before August 20, 1929.

Subject to the more detailed provisions of the Plan and Agreement of Reorganization, the holders of the present securities depositing thereunder on or before August 20, 1929 will, subject to consummation of the Plan, receive the

DEBENTURE BONDHOLDERS

(a) An equal principal amount of Participating Debentures of the New Company, to be dated January 1, 1930 and to mature January 1, 1950. The Participating Debentures will bear interest at the rate of 6% per annum from January 1, 1930. For the first five years interest will be payable only out of net earnings (as defined in the Plan), but payment must be made to the extent earned. Interest will be cumulative for the years 1933 and 1934, whether earned or not. After 1934 interest at 6% must be paid whether earned or not and will be a fixed charge. The Participating Debentures will be further entitled to receive, before the payment of any dividends, 50% of the net earnings up to an additional 3% per annum on the Debentures, making the total interest payment to which the Debentures may become entitled 9% annum. This additional 3% will be cumulative to the extent earned. The Participating Debentures will be subordinated to current borrowings for operations.

One share of Common Stock of the New Company, in respect of each \$100 principal amount of Debenture Bonds of the present Company deposited.

Depositing bondholders will be entitled to have the January 1, 1930 interest coupons attached to their deposited bonds returned to them for collection of the January 1, 1930 interest, the payment of which will be assumed by the New Company.

PREFERRED STOCKHOLDERS

A Subscription Warrant and/or Fractional Warrant entitling the holder to subscribe on or before August 20, 1929 at \$5 per share for 11/2 shares of Common Stock of the New Company in respect of each share of Preferred Stock deposited.

The new when issued stock which was moved over from the Produce exchange reacted on profit taking carryity Investments, which has large holdings of Middle West Utilities, rose 15 points to a new peak while Com-monwealth Edison, another Insull interest hit the new high level of 425, closing at 421 points, up 21 points.

Electric Investors had a rapid run up of nearly 19 points to a new top at 279% as traders bought in expectation that the action on the rumored split up would be taken at the diractors' meeting today. When announcement was made that only rou-tine business had been transacted at the meeting the stock dropped, but re-

tained 16 points of its gain.

American Light and Traction also was a feature of the utilities with a 57 point closing gain and a new peak established at 385. Control is owned by United Light & Power, which has been moving up in anticipation of an exchange offer from Commonwealth & Southern and the stock has risen steadily from 205 in recent utility markets. United Light and Power A resumed its upward move, as did such favorites as American Superpower, Electric Bone & Share, and Allied Power & Light.

First Lien 61/2% Sinking Fund Gold Bonds (With Common Stock purchase warrants)

Nationally known borrower is one of the five largest baking organizations in the United States, owning the entire capital stock of 22 non-competitive concerns operating complete baking units in 13 states. Territorial diversification favors consistent earnings

throughout each year. The advantages of unified management are obvious. By manufacturing and marketing well known brands of bread and cake an essential daily demand of every American table is supplied. The cake business, while not so essential, is becoming an increasingly important part of the business. Through membership in Quality Bakeries of America, each plant participates in the benefits of a co-operative organization including 120 baking concerns.

Why we recommend these bonds:

Security is unusually great.

2. Assets are exceptionally large.

3. Net earnings are high, and growing.

4. Business is for cash, with credit risk eliminated.

5. Products are essential to life and health.

6. Business has demonstrated stability.

7. Management is responsible and capable.

8. Bondholders may share in Borrower's increasing prosperity.

Power - Gas - Water

ONCURRENTLY with the acquisition of a majority of the Common Stock of Southern Natural Gas Corporation, the holders of the Common Stock of United Power Gas and Water Corporation, which also owns 79% of the Class B Stock of Federal Water Service Corporation and 100% of the Class B Common Stock of Peoples Light and Power Corporation, have voted to change the name of United Power Gas and Water Corporation to Tri-Utilities Corporation.

Southern Natural Gas Corporation will own and operate a natural gas transmission system approximately 830 miles in length, now under construction and scheduled for completion by December 31, 1929, which will serve the greater part of the territory generally known as the Industrial Southeast. This natural gas system will be one of the largest in the country and will extend from Louisiana eastward through the Birmingham, Alabama, district to Atlanta, Georgia, with branch lines reaching many other cities.

Upon completion of the Southern Natural Gas Corporation's system, Tri-Utilities Corporation will control over \$225,000,000 of public utility properties supplying the necessities of electric light and power, water service and manufactured and natural gas to territories having a total population estimated to be in excess of 3,650,000. The territory served will embrace twenty-five states extending from the Atlantic to the Pacific.

# PACKARD STANDARD EIGHT PRICES REDUCED \$290

THE Packard Motor Car Company has just advised us by telegram that effective August 1, prices of all models of the Standard Eight have been reduced \$290. The new prices are as follows:

respectively the state of the s	126"	Whee	elbase	Mod	lels		
5-Passenger	Sedan	t behow when	•		•		\$1985
2-Passenger	Coupe	•			100		2060

4-Passenger	Coupe	American St.	•	or the second	•	• 44.	\$2285
5-Passenger	Club Se	edan	•	•			2285
7-Passenger	Sedan	•	•	•	•		2285
7-Passenger	Sedan 1	Limou	isine	•	1172		2385
7-Passenger	Touring	g.	Service Control		100 de 10		2185
2-Passenger				· 17 74	van i		2085
5-Passenger				•	•		2085

These reductions have been made because the factory expects to announce in the Fall new cars which though the same in size and of characteristic Packard appearance, will have enough changes to classify them as new models.

(Prices f. o. b. Detroit)

Many of these improvements and refinements have been in production for some time on current models. This, together with the fact that the new cars will be priced higher than the present cars were before the reduction, gives today's purchasers a very great price advantage. And also, immediate use of the largest selling and most popular car in the fine car field.

Two-thirds of those who buy the Packard Standard Eight give up other makes of cars. Thousands prefer to buy out of income. Your used car will be accepted as cash and if of average value will more than make the down payment on a new car.

Macbeth and Martinelli Given High Praise.

That grand old show, "Lucia di Lammermoor," went on at Ravinia last night with all the traditions. Edgar hurled his plumed hat in one di-rection and his long coat in another. Lucia tore her veil into shreds. The choristers stood immovable but high-ly melodious groups. Meanwhile the orchestra played a sort of early Vic-orian jazz for the tragic scenes. I had never heard Giovanni Martielli sing the part of Edgar before. It was therefore both a surprise and a pleasure to hear how accurately and deftly that vigorous voice intoned the melodies that Donizetti set down for this rôle, with what good sense of the stage he carried off both its musical

## Insull's Hopes High for New Home of Opera

Blames Influenza Scar for 1928 Troubles.

BY EDWARD MOORE.

'It was the flu scare that hurt the opera business last season," said Samuel Insuli yesterday, referring to a statement in the Civic Opera com-pany's annual statement to the effect that 35,348 fewer persons had attend-ed the opera than in the season be-fore.

ried a large front page headline ad-vising every one to keep at least three bor," Mr.Insull said. "From that day our business felt a severe drop. We carried on; we met our obligations we said nothing about it at the time But there was no use trying to cover it up in the annual statement. That was the time to tell the facts."

Mr. Insull has great hopes of the new opera house on Wacker drive.

"In the Auditorium we could assemble an audience that meant about \$12,500 in receipts," he said. "In the new building we will be able to take in about \$16,000 a performance. That is going to mean something, especially as at quite a number of the more popular operas at the Audi

were obliged to turn patrons away for days before the performance.

"Our subscription for the coming season is much better than ever before, better even than the total subscription of last season."

Mr. Insull did not have the figures at his finger tips, but a statement from officials at the Auditorium proved that this, too, was correct. Last season's total for subscription seats was \$424,346.08, this year's up to the night of July 20 is \$521,084.30. The box der how? Perhaps it was in the moonlight. Some other figures came out of the analysis. Of the main floor seats priced at \$6,300 more than the enpacity of the Auditorium have been sold. A new section priced at \$5 has yielded returns of about 1,000; the \$4 seats show an increase of about 500. in a hurry. If it is going to make trouble you can set yourself down as the troublemaker—not your husband nor the disliked one. Anna Belena Kahn Do you suppose that you are the first bride who has been confronted with your problem? Tou're not, you know. It's quite a common failing for wives to take a dislike to their husband's favorite pals and the reason back of it is far more often the wife's own fault than the pal's. An unrecognized jealousy or a feverish desire not to share your husband with any one is oftener to blame than faults of the "shadow," as you call him.

Krause Permanents

These reasons explain the supremacy of a Krause Wave.

1. We guarantee every permanent until your hair grows out.

2. All Krause operators have had years of experience in this work.

3. Each wave is tested by a representative of the Mastro-L Laboratorics to insure perfect results.

"WHAT beautiful wavy hair she has!" How often have you heard that or said it yourself? You, too, can have beautiful hair if you will use Jo-Cur Waveset. It is so simple; just follow the directions. Jo-Cur makes your hair beautiful and makes your hair beautiful and the waves you make at home are lasting. Millions of women now use Jo-Cur Waveset to have glorious wavy hair. Just think, more than three million bottles were sold last year. Buy a bottle of Jo-Cur today and have beautiful wavy hair this summer. 50 cents for a generous bottle.

### WASHINGTON SOCIETY

Washington, D. C., July 21.—(Special.)—President and Mrs. Hoover have as house guests the former sovernor of Maine, Percival Baxter, and Edward G. Lowry, who have been at the White House for two days. There were a few other guests for dinner to night.

Vice President Curtis has returned to his apartment at the Mayfower after a visit to his son-in-law and daughts; Mr. and Mrs. Webster Enight II., of Providence, in their summer home, Greyholme farm, at West Warwick, R. I.

Among the aides detailed for duty at the White House during the forth-coming season who have already as sumed their duties are Lieut. Charles E. Saltzman, son of Gen. Charles McK. Saltzman, and Lieut. Williams E. G. Erskine of the army, Capt. R. L. Montague, U. S. M. C., and Lieut. Commander Alexander Macomb and Lieut. Liewellyn J. Johns of the navy.

Lieut. and Mrs. Thomas J. Ryan Jr., the latter formerly Miss Josephine Flah of Chicago, have Lieut. A. N. Bolton as their guest at Wardman Park hotel.

The Chinese minister, Chao-Chu Wu, left today for Williamstown. Mass., to deliver an address at the opening of the Institute of Politics tomorrow.

Higher waistlines and siightly dropped hems, we read, are the latest Paris decrees. That won't be such good news to a number of women. A waistline that doesn't have to be marked with a belt may cover up a whole multitude of calorie sins. If we ever get back to the real tight waistline, life is going to be made until the moment of the Parisian decree) quite a few pounds could be concelled (rather, flattened down and widened out) and still give the figure the illusion of slenderness. But once they begin curving in the waistline right on its own home plate, that poundage is going to get unruly and bulge all over the neighboring territory.

On the whole, women, per thousand, have a great deal less fat upon them now than women had when the pulled in corset sent their adipose rolling over the neighboring traps of earlier days their busts and uppe

D. A. R. to See Army and Navy Training Stations in Illinois

The first of three tours of inspection to army and navy bases in Illinois will be made on Aug. 8 by members of the Daughters of the American Revolution. On that day several hundred of the women will visit Fort Sheridan at the invitation of Brig. Gen. C. H. Conrad Jr., commandant. The women will attend the Citizens' Military training camp field meet, and see the formal guard mount and the evening parade. They will be given a reception by the officers of the garrison and their wives at the Officers' club at 6:30 p. m. Mai. Gen. Frank Parker, commanding the Sixth corps area, and Mrs. Parker will be present.

On Aug. 13 the D. A. R. will visit the Illinois National Guard encampment at Camp Grant, and on Aug. 21, they will inspect the Great Lakes Naval Training station.

abow identical overhangings of avoir dupols. The only way practically, then, to beat the game is to whittitle down the waistline, the sides and the hips so that there jes' can't be any bulging. Even without the foundation garment in closer molded form, which I suspect the will come to if the decree proves popular, just the winding of a belt around the midsector enlarges a figure not shaved down to par. Your house apron talls you that.

And since the waistline can't drop lower, very well, and it has to go somewhere for a change, it must go up. So it looks as if it would not be time wasted getting the extra pounds off that midsection.

The good old bending exercises still remain the best muscular activities for wrenching the fat off. Touching the finger tips to the floor from a standing position, and from prone poedition stretching forward until finger tips reach toe tips are the tried and true old timers. And, of course, you hasten the recovery of the flapper waistline by keeping the died down to what you need rather than what you can eat.

## Elmer Praises **Musical Cargo** of Dream Ship

Band Concert Gets It Share of Applause.

BY ELMER DOUGLASS.

During the 11 to 11:30 period last night W-G-N's Dream Ship orchestra sailed forth—and its cargo was constuff that dreams are made of." The ctions were the Andante movement from Beethoven's Fifth Symphony "Caprice Viennois," and Schumann's immortal Nocturne, and they were played with a zest which indicated that the cool, refreshing breeze that

serving of special mention on thi concert was the Prelude to Act I. of Wagner's "Lohengrin" and Sibe tone poem "Finlandia," the latter being especially rich and colorful.

In many respects the program by Jean Goldkette and his W-G-N augmented dance orchestra, 9:30 to 10, was on the order of a concert. Merely to tabulate the program would be misleading; it is the way that the numbers are orchestrated and played that counts. These special programs lead one to suspect that Mr. Goldkette could enter the classical field of music A word of praise is due the pro-

grams presented by the Russian cathedral male quartet and soloists, from New York, through KYW, 9 to 9:30, is. These and the Polish memoria lite con- from WMAQ, 10:30 to 11.

NOW BABY SLEEPS

Fires and mosquitoes bothered baby so much he often couldn't sleep. But now everything's all right. I spray Black Flag Liquid in the room, and it kills every fly and mosquito.

Black Flag Liquid kills ants, roaches, bedbugs, too. For it is the deadliest insect-killer made. (Money back if it doesn't prove so.) 0199, 8.F.C.

Lemon Crop Is Large, but Price Ascends to

BY FRANK RIDGWAY. Hot weather and a jump in lemon prices gave the lemonade question a big stir here yesterday. The wholesale price of lemons was boosted \$1.45 a crate [300 in a crate]. An Evanston storekeeper got excited and charged his customers \$1.20 a dozen, or 10 cents apiece, double the city retail price. Chicago retailers were asking from 55 to 60 cents a dozen for high grade lemons.

Buyers at the auction on the cen-tral market paid \$13.45 a crate for lemons yesterday morning. That is nearly 41/2 cents each, or more than louble wholesale prices paid last year, although the lemon crop is the largest in the last four seasons. In order to move the big crop

lemons were sold earlier in the season for as low a price as \$4 a crate. As a result more lemons already have been sent to market than were harvested during any one of the three previous years. It is estimated that there were more than 16,000 carloads of lemons produced this year, or 40 per cent more than last year.

This time last year lemons sold on the wholesale market for about \$6.10 a crate, averaging \$6.40 in July and \$6.05 in August. There were 3,000 carloads of lemons still in the hands of growers during the last week in July last year. At the present time there are approximately 1,400 carloads yet

year ends in September. Market specialists explain that the lemon crop moved rapidly earlier in the season because there was a big

to come to market before the ler

crop and prices were low. Citrus fruit growers' reports indicate that the crop for next year, which will begin coming to market in No-vember, will be 60 per cent short of this season's big harvest. This is not considered a price influencing factor on the lemons that are now

TOWER The TRIBUNE TOWER is the coolest building in

Chicago. All the corridors are open to the outside air. Every office is an out-

side office. Every south, east, and west window has an awning.

The building is kept immaculately clean. Windows stay up. It is

quiet. The air is pure and there are no buildings to cut off light and breeze and radiate heat in your Our offices are cheer-

ful, delightful in summer and comfortable in winter. If you are interested, let

us try to meet your requirements. HOLMES ONDERDONK

REAL ESTATE LOANS.

SECOND MORTGAGE LOANS

This is a day when it seems to be the custom for everybody to advertise his service or product as the best or the cheapest, or the bixeest, or to apply some other super-superlative to the thing for sale. The public cannot help but be confused when every one makes the highest claims for the thing or service desired.

Some concerns, in order to give the customer a chance to prove for himself that the product is superior, may sell on free trial offers, "money ry funded if satisfaction is not received, we wish it were possible for us to operate on such a basis; obviously is not, for when a morigaze note is sixued and a trust deed recorded the deal is closed.

All we can do and ask is that dis-criminating home owners who are in the market for second mortgage loans come in and find out exactly what the charges and other conditions are, and by inquiry to feel perfectly satisfied that when one makes a second mort-case loan as this institution he has received rates, terms, and other condi-tions which are not an undue impo-sitions which are not an undue impo-sition are not loaded with miscala-neous extras, and that our staff head of the second with the second with the best interests of the in-dividual home owners as with the in-terests of the bank which they repre-sent.

The public is pretty well informed as to our rates but it is probably not out of place for us to repeat them. We charge 8% accruing interest. Commissions are \$35 a thousand for one year \$65 a thousand for two years. And these commissions apply regardless of whether the borrower chooses to pay back 2% of the principal cach month, or whether the chooses to make it a higher percentage. We personally invite you to inves-tigate the second mortgage plan which has been sponsored by the Personal Loan and Savings Bank as Agent.
